ASAIO JOURNAL–VOLUME 42

Subject Index

Editor's Note: This index encompasses only the material presented in this issue of ASAIO JOURNAL Volume 42, Numbers 1, 3, 4, and 6. Please consult the September–October issue (Vol.42, No.5) for an index of the contents of that body of work.

A

Abiomed BVS-5000 ventricular assist device, thromboembolic complications in peripartum cardiomyopathy patient supported with, 240
Acute chest syndrome, extracorporeal membrane oxygenation for, in child with severe sickle cell anemia, 236
Adult placenta
  with coronary artery bypass graft and postcardiotomy cardiogenic shock, 19
  heparin bonded extracorporeal life support systems and, 16
  for peripheral organ support, 12
Air interface, removal of, effect static pressure on red blood cells on, 947
Airway obstruction, acute, extracorporeal membrane oxygenation for, 321
Anemia
  severity of, in erythropoietin-treated hemodialysis patients, 146
  sickle cell, severe, extracorporeal membrane oxygenation for acute chest syndrome in child with, 236
Antipyrine, total body water assessment by single dose of, in hemodialysis patients, 271
Aortic helical flow, ultrasound confirmation and initial documentation of, 951
Arterial filter, emboli from extraluminal blood flow hollow fiber oxygenator with and without, during cardiopulmonary bypass in pig model, 1010
Arteriovenous fistulas, anatomic snuff box, in hemodialysis patients, clinical experience with, 177
Artificial heart
  control of, 932
  total, extracorporeal membrane oxygenation *versus*, for immediate cardiac allograft failure, 314
Artificial liver, prolonged support using, in child with fulminant hepatic failure, 233
ASAIO, proactive stance assumed by, 243
Automated cycler dialysis, Canadian-USA Multicenter Study of, 136

B

Balloon counterpulsation
  extraaortic, as bridge to other mechanical assists, 190
  intraaortic, balloon rupture and, prospective evaluation of factors associated with, 37
Biomaterials, development in Russia and the Independent States, 4
Bioprosthetic heart valves, decrease in stiffness after cross-linking, mechanism for, 993
Biosensors, fiberoptic, portable, assay development for, 984
Blood flow
  emboli from extraluminal blood flow hollow fiber oxygenator with and without arterial filter, during cardiopulmonary bypass in pig model, 1010
  helical, aortic and thoracic, ultrasound confirmation and initial documentation of, 951
Body water, total, in hemodialysis patients, assessment by single dose of antipyrine, 271

C

Cardiac allograft, immediate failure of, total artificial heart *versus* extracorporeal membrane oxygenation for, 314
Cardiac massage, with Anstadt cup, aortocoronary saphenous vein graft function after, 295
Cardiac prostheses. *See also* Artificial heart
  peak stress identification in, two-dimensional *versus* three-dimensional principal stress analyses compared for, 154
Cardiac surgery, reduction of heparin requirements for, 34
Cardiogenic shock, postcardiotomy
  extracorporeal membrane oxygenation with coronary artery bypass graft and, 19
  ventricular assist devices for, 211
Cardiomyopathy, peripartum, thromboembolism in, Abiomed BVS-5000 ventricular assist device and, 240
Cardiopulmonary bypass
  emboli from extraluminal blood flow hollow fiber oxygenator with and without arterial filter during, in pig model, 1010
  heparin coated equipment for, 34
  platelet function and coagulation/fibrinolysis with, 301
  partial, for evaluating ischemia-reperfusion injury in rats, 1027
Cardiotomy, cardiogenic shock following
  extracorporeal membrane oxygenation with coronary artery bypass graft and, 19
  ventricular assist devices for, 211
Catheter access, for peripheral organ support, 12
Centrifugal pumps
  magnetically suspended
    as cardiac assist device for long-term application, 68
    prototype development and, 275
  servoregulation of, 282
Chest syndrome, acute, extracorporeal membrane oxygenation for, in child with severe sickle cell anemia, 236
Children
  extracorporeal membrane oxygenation for acute chest syndrome in, with severe sickle cell anemia, 236
  extracorporeal membrane oxygenation in neonates and, second course of, 230
  fulminant hepatic failure in, prolonged artificial liver support for, 233
  partial liquid ventilation in child on extracorporeal membrane oxygenation, 317
  ventricular assist devices for, tubular, 255
Coagulation, heparin-coated cardiopulmonary bypass equipment and, 301
Collagen, polyester vascular grafts impregnated with, as small diameter blood conduits, 974
Continuous peritoneal dialysis
  ambulatory, Canadian-USA Multicenter Study of, 136

fractional urea clearance in, relationship between urine volume and drain volume as determinants of, 1006
protein catabolic rate and, 46
Coronary artery bypass graft, extracorporeal membrane oxygenation with postcardiotomy cardiogenic shock and, 19
Coronary revascularization, dialysis and, 139
Cross-linking, decrease in stiffness of bioprosthetic heart valves after, mechanism for, 993

D

Density, perfluorinated hetero-hydrocarbons as respiratory media and, 968
Diabetes mellitus, peritoneal dialysis for end-stage renal disease in, 1
Dialysis. *See also* Dialysis membranes; Dialyzers; Hemodialysis; Peritoneal dialysis
Canadian-USA Multicenter Study of, 136
co-morbid risk factors at start of, impact on survival or end-stage renal disease patients, 164
coronary revascularization and, 139
diseases associated with, national surveillance of, during 1993, 219
erythropoietin and, injection site effect on levels of, 263
peritoneal, for diabetes and end-stage renal disease, 1
Dialysis membranes
high-flux, transport properties of, blood contact and reuse effects on, 288
research directions for, 133
Dialyzers, research directions for, 133
Drain volume, as determinant of fractional urea clearance, in continuous peritoneal dialysis, urine volume related to, 1006

E

Echocardiography, two-dimensional and contrast, for venous cannula placement, in extracorporeal membrane oxygenation, 142
Echo contrast, spontaneous, with mechanical heart valve implants, 24
Emboli
from extraluminal blood flow hollow fiber oxygenator with and without arterial filter, during cardiopulmonary bypass, in pig model, 1010
in peripartum cardiomyopathy patient, supported with Abiomed BVS-5000 ventricular assist device, 240
Endoscopic tubing, expanded polytetrafluoroethylene, treated by STERIS PROCESS, surface analysis of, 306
Endotracheal tubes, ultra thin walled, reduction of respiratory system resistance with surfactant deficiency using, 1000
End-stage renal disease
peritoneal dialysis for, in diabetic patients, 1
refractory vascular access problems in, percutaneously inserted double-lumen silastic catheter for, 244
survival and, impact of co-morbid risk factors at start of dialysis on, 164
Energy index method, for performance assessment of prosthetic heart valves, 170
Erythropoietin, hemodialysis and
administration during, 27
anemia severity and missed dialysis treatments and, 146
injection site for, effect on levels during dialysis, 263
Expanded polytetrafluoroethylene endoscopic tubing, treated by STERIS PROCESS, surface analysis of, 306
Extraaortic balloon counterpulsation, as bridge to other mechanical assists, 190
Extracorporeal membrane oxygenation
for acute airway obstruction, 321
for acute chest syndrome, in child with severe sickle cell anemia, 236
with coronary artery bypass graft and postcardiotomy cardiogenic shock, 19
heparin bonded, 16
host vessel diameter influence on oxygen transfer and, 246
intracranial hemorrhage during, timing of, 938
in neonates, second course of, 230
partial liquid ventilation in child on, 317
servoregulation of centrifugal pumps for, 282
total artificial heart support *versus,* for immediate cardiac allograft failure, 314
venous cannula placement in, two-dimensional and contrast echocardiography for, 142

F

Fiberoptic biosensors, portable, assay development for, 942
Fibrinolysis, heparin-coated cardiopulmonary bypass equipment and, 301
Filters, arterial, emboli from extraluminal blood flow hollow fiber oxygenator with and without, during cardiopulmonary bypass in pig model, 1010
Fulminant hepatic failure, prolonged artificial liver support in child with, 233

G

Gastrointestinal nitrogen extraction, replacing renal function with, 929
Gastrointestinal system, left ventricular assist devices and, 150
Glycylglycine, in hemodialysis and peritoneal dialysis solutions, 984

H

Heart valves, prosthetic. *See* Prosthetic heart valves
Helical flow, aortic and thoracic, ultrasound confirmation and initial documentation of, 951
Hemodialysis. *See also* Dialysis; Dialysis membranes; Dialyzers
anatomic snuff box arteriovenous fistulas in, clinical experience with, 177
blood compatible and permselective hollow fiber membranes for, 1019
determination of amount of recirculation during, limitations of peripheral venous blood for, 41
erythropoietin administration during, 27
erythropoietin treatment and, anemia severity and missed dialysis treatments and, 146
glycylglycine usefulness in solutions for, 984
interleukin-2 receptor release by peripheral blood mononuclear cells and, 60
total body water assessment and, by single dose of antipyrine, 271
Hemorrhage, intracranial, during extracorporeal membrane oxygenation, timing of, 938
Heparin
cardiopulmonary bypass equipment coated with, 34
platelet function and coagulation/fibrinolysis with, 301

heparin bonded extracorporeal life support systems and, 16
Hepatic failure, fulminant, prolonged artificial liver support in child with, 233
Hetero-hydrocarbons, perfluorinated, as respiratory media, quantitative structure-activity relationships of, 968
Hollow fiber membranes
extraluminal, with and without arterial filter during cardiopulmonary bypass in pig model, emboli from, 1010
for hemodialysis, blood compatible and permselective, 1019
Hypothermia, whole body, induction with venovenous perfusion, 250

I

Independent States, biomaterial development in, 4
Interleukin-1, synthesis by mononuclear cells, whole blood exposure to shear stress and, 52
Interleukin-1 receptor antagonist, enhancement of synthesis by mononuclear cells, whole blood exposure to shear stress and, 52
Interleukin-2
peripheral blood mononuclear cell release of, hemodialysis and, 60
synthesis of, uremic middle molecules and, 64
Intraaortic balloons, rupture of, prospective evaluation of factors associated with, 37
Intracorporeal membrane gas exchange, for management respiratory failure, 207
Intracranial hemorrhage, during extracorporeal membrane oxygenation, timing of, 938
Intravascular oxygenation. *See* Extracorporeal membrane oxygenation
Ischemia-reperfusion injury, partial cardiopulmonary bypass for evaluating, in rats, 1027

L

Left ventricular assist devices, gastrointestinal consequences of, 150
Liquid ventilation
partial, in child on extracorporeal membrane oxygenation, 317
quantitative structure-activity relationships of perfluorinated hetero-hydrocarbons as respiratory media and, 968
for respiratory failure management, 209
Lungs, acceleration of growth of, for respiratory failure management, 201
Lymphocytes, *in vitro* stimulated, uremic middle molecules and, 64

M

Mechanical assist devices. *See also* Ventricular assist devices
extraaortic balloon counterpulsation as bridge to, 190
Mechanical heart valve implants, spontaneous echo contrast with, 24
Mechanical ventilation, strategies for use in severe acute respiratory failure, 204
Mononuclear cells, in peripheral blood
interleukin-2 release by, hemodialysis and, 60
tumor necrosis factor α, interleukin-1 receptor antagonist, and interleukin-1 synthesis by, whole blood exposure to shear stress and, 52

N

Neonates, extracorporeal membrane oxygenation in, second course of, 230
Nitric oxide, for respiratory failure management, 199
Nitrogen, gastrointestinal extraction of, replacing renal function with, 929

O

Oxygen
aqueous preparations of, for respiratory failure management, 196
solubility of, perfluorinated hetero-hydrocarbons as respiratory media and, 968
uptake of, in perfluorocarbon emulsions, modeling of, 181
Oxygenation. *See* Extracorporeal membrane oxygenation

P

Partition coefficient, perfluorinated hetero-hydrocarbons as respiratory media and, 968
Perfluorinated hetero-hydrocarbons, as respiratory media, quantitative structure-activity relationships of, 968
Perfluorocarbon emulsions, oxygen uptake in, modeling of, 181
Peripheral blood
mononuclear cells in
interleukin-2 release by, hemodialysis and, 60
tumor necrosis factor α, interleukin-1 receptor antagonist, and interleukin-1 synthesis by, whole blood exposure to shear stress and, 52
venous, limitations for determining recirculation during hemodialysis, 41
Peripheral organ support. *See also* Extracorporeal membrane oxygenation
vascular access for, 12
Peritoneal dialysis
Canadian-USA Multicenter Study of, 136
continuous, protein catabolic rate and, 46
for diabetes and end-stage renal disease, 1
glycylglycine usefulness in solutions for, 984
tissue reaction to percutaneous device with titanium fiber mesh applicable for, one stage *versus* two stage surgical technique and, 961
"Y" connector for, 8
Peritoneum-lined vascular grafts, vena cava replacement with, 266
Placenta, adult. *See* Adult placenta
Plasma exchange, high flux, with modified rotating membrane system, 957
Platelet function, heparin-coated cardiopulmonary bypass equipment and, 301
Polyester vascular grafts, collagen impregnated, as small diameter blood conduits, 974
Prosthetic heart valves
bioprosthetic, decrease in stiffness after cross-linking, mechanism for, 993
mechanical, spontaneous echo contrast with, 24
performance assessment of, energy index method for, 170
Protein catabolic rate, continuous peritoneal dialysis and, 46

R

Recirculation, during hemodialysis, limitations of peripheral venous blood for determining, 41
Red blood cells, static pressure on, effects on removal of air interface, 947

Renal function. *See also* Dialysis; Dialysis membranes; Dialyzers; End-stage renal disease; Hemodialysis; Peritoneal dialysis
replacing with gastrointestinal nitrogen extraction, 929
Reperfusion, ischemia-reperfusion injury and, partial cardiopulmonary bypass for evaluating, in rats, 1027
Respiratory failure, advances in management of, 195
aqueous preparations of oxygen for, 196
intracorporeal membrane gas exchange for, 207
liquid ventilation for, 209
lung growth acceleration for, 201
nitric oxide for, 199
strategies for mechanical ventilation in severe acute respiratory failure and, 204
Respiratory media, perfluorinated hetero-hydrocarbons as, quantitative structure-activity relationships of, 968
Respiratory system, resistance of, with surfactant deficiency, reduction with ultra thin walled endotracheal tube, 1000
Rotating membrane system, modified, high flux plasma exchange using, 957
Russia, biomaterial development in, 4

S

Saphenous vein grafts, function after cardiac massage with Anstadt cup, 295
Shear stress, whole blood exposure to, tumor necrosis factor α and interleukin-1 receptor antagonist synthesis enhancement by, 52
Shock, cardiogenic, postcardiotomy
extracorporeal membrane oxygenation with coronary artery bypass graft and, 19
ventricular assist devices for, 211
Sickle cell anemia, severe, extracorporeal membrane oxygenation for acute chest syndrome in child with, 236
Spontaneous echo contrast, with mechanical heart valve implants, 24
STERIS PROCESS, expanded polytetrafluoroethylene endoscopic tubing treated by, surface analysis of, 306
Stress analysis, two-dimensional *versus* three-dimensional, for identification of peak stresses in cardiac prostheses, 154
Surfactant deficiency, respiratory system resistance with, reduction with ultra thin walled endotracheal tube, 1000
Surgical technique, one stage *versus* two stage, tissue reaction to percutaneous device with titanium fiber mesh applicable for peritoneal dialysis and, 961

T

Thoracic helical flow, ultrasound confirmation and initial documentation of, 951
Thromboembolism, in peripartum cardiomyopathy patient, supported with Abiomed BVS-5000 ventricular assist device, 240
Titanium fiber mesh, tissue reaction to percutaneous device with, for peritoneal dialysis, one stage *versus* two stage surgical technique and, 961
Total artificial heart, extracorporeal membrane oxygenation *versus*, for immediate cardiac allograft failure, 314
Total body water, in hemodialysis patients, assessment by single dose of antipyrine, 271
Tumor necrosis factor α, enhancement of synthesis by mononuclear cells, whole blood exposure to shear stress and, 52

U

Ultrasound, confirmation and initial documentation of aortic and thoracic helical flow using, 951
Urea clearance, fractional, in continuous peritoneal dialysis, relationship between urine volume and drain volume as determinants of, 1006
Uremic middle molecules, *in vitro* stimulated lymphocytes and interleukin-2 production and, 64
Urine volume, as determinant of fractional urea clearance, in continuous peritoneal dialysis, drain volume related to, 1006

V

Vapor pressure, perfluorinated hetero-hydrocarbons as respiratory media and, 968
Vascular access
in end-stage renal disease, percutaneously inserted double-lumen silastic catheter for, 244
for peripheral organ support, 12
Vascular grafts
aortocoronary saphenous vein graft function after cardiac massage with Anstadt cup, 295
peritoneum-lined, vena cava replacement with, 266
polyester, collagen impregnated, as small diameter blood conduits, 974
Vena cava, replacement of, with peritoneum-lined vascular graft, 266
Venous cannula, placement of, in extracorporeal membrane oxygenation, two-dimensional and contrast echocardiography for, 142
Venovenous bypass circuits, host vessel diameter influence on oxygen transfer and, 246
Venovenous perfusion, induction of whole body hypothermia with, 250
Ventilation
liquid. *See* Liquid ventilation
mechanical, strategies for use in severe acute respiratory failure, 204
Ventricular assist devices
Abiomed BVS-5000, thromboembolic complications in peripartum cardiomyopathy patient supported with, 240
left ventricular, gastrointestinal consequences of, 150
magnetically suspended
for long-term application, 68
prototype development and, 275
pediatric, tubular, 255
for postcardiotomy cardiogenic shock, 211
Viscosity, perfluorinated hetero-hydrocarbons as respiratory media and, 968

W

Whole blood, exposure to shear stress, tumor necrosis factor α, interleukin-1 receptor antagonist, and interleukin-1 synthesis by mononuclear cells and, 52

Y

"Y" connector, for peritoneal dialysis, 8
